

The whole website should be in arabic, no english, no french.

Embedded video: possible to be changed by the admin

<https://basedonloveofficial.com/...> apply this idea in my platform

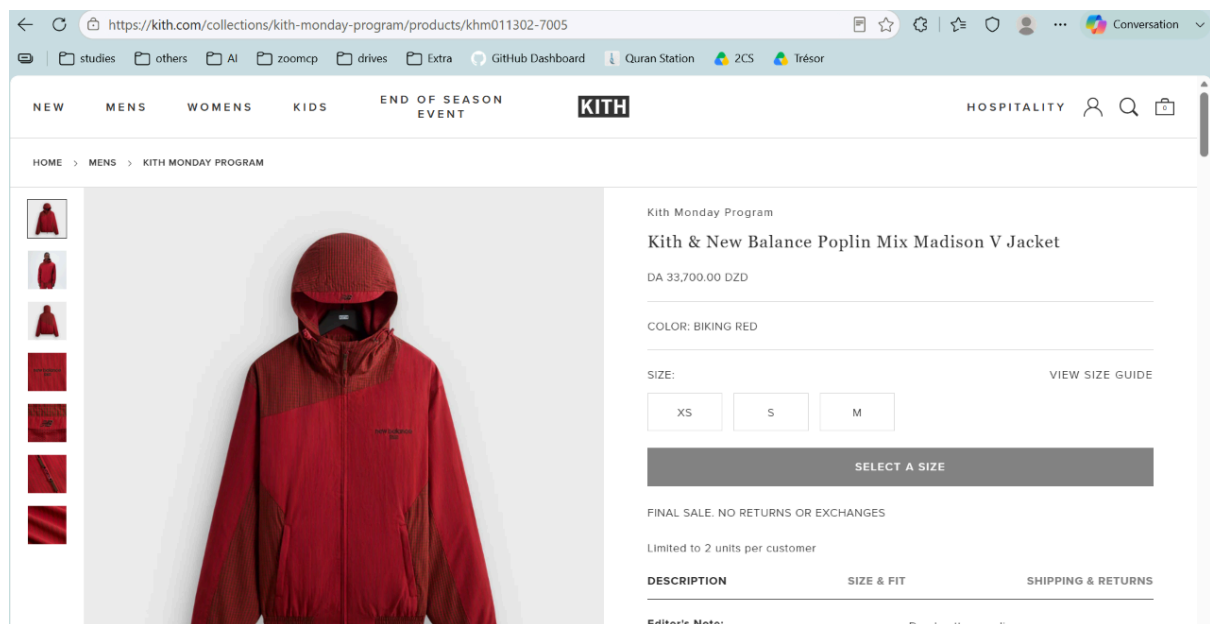

Non savable images

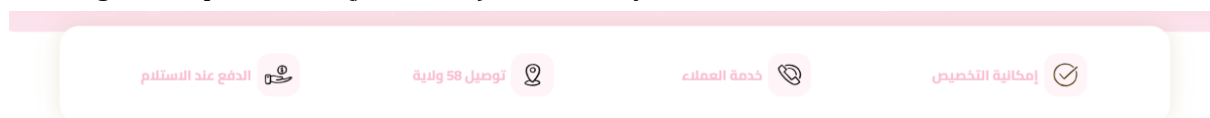

Use local storage, once the user enters, his info will be saved.

Menu of <https://kith.com/> (use categories then write other sections like privacy....)

Large screens, main image would be swipable (no gap between images), get inspired from this website. Same thing for mobile (no small rectangles).

Running bar inspired from (jana store), add it in my website.

Pop up for the size guide (product page)
